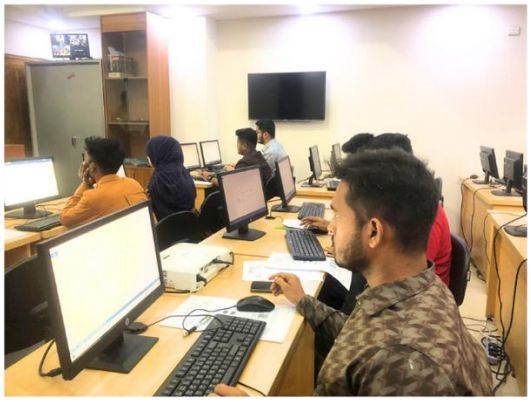
Skill Development Training under EDGE Project at MBSTU



MBSTU, as an educational institution, hosts events and training programs that are open to the **general public**. Under the **EDGE project** (Enhancing Digital Government and Economy), the **CSE and ICT departments** organized short-term skill development classes in areas such as **Office Management, Python Programming, Digital Marketing, Web Designing, and Graphics Designing**. These programs are designed to enhance practical skills and employability for participants who are **not formally enrolled** at the university. **Refreshments were provided** after each session, creating an inclusive and supportive learning environment.

These initiatives qualify as **executive education and vocational training**, providing accessible, short-duration learning opportunities beyond the regular academic curriculum. In alignment with **SDG 4.3.3**, **MBSTU** hosts short-term training programs and skill development classes that are **open to the general public**.
